

Fluid Dynamics

Christine Scotti, PhD, W.L. Gore & Associates

FILTRATION

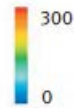

Protect people, protect the environment, protect the product – in manufacturing, controlling contamination is a must. Gore provides reliable air, gas, liquid and particle filtration solutions that purify processes, increase yields and control costs.

JEVT, March 2016

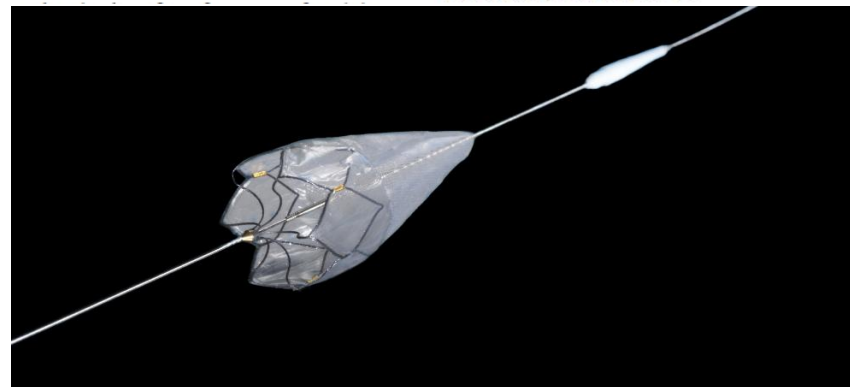

Wall Shear Stress
(dynes / cm²)

Conventional End-to-Side Anastomosis

Endoluminal Anastomosis with the GORE® Hybrid Vascular Graft

Computational Fluid Dynamics –
Flow rate: 600 mL / min, 4.8 mm, 30°, T = 0.4s

PHARMACEUTICAL & BIOPHARMACEUTICAL

Rigorously compliant to meet the changing needs of our global customers, Gore's solutions for pharmaceutical and biopharmaceutical manufacturers include a suite of efficient, technology-driven products for single- and multi-use applications.
